| Subject: | Broken encoding in billing e-mails | | |
| Description: | Non-ASCII text in billing e-mail headers (e.g. "To") are not properly MIME encoded (RFC 2047). (This bug originally reported by user vinaigre, but I deleted it by accident. Oops!) | | |

I believe this is now fixed. Would you like me to regenerate your most-recent invoice to check that this is the case?

2013-09-08 13:12 - vinaigre

Fixed in the last e-mail.

(Being slightly picky, I'd also add a space between the name and the e-mail address in the "To" header.)

2013-09-08 16:22 - admin

Hmm, there _is_ a space between them in the copy I view, i.e. presentation in *mutt*.

However, in the raw data of the email:

```
<pre>
From: BitFolk Billing <billing@bitfolk.com>
To: =?UTF-8?Q?Bob=20Caf=C3=A9?=<andy@bitfolk.com>
</pre>
```

Perhaps it is because I am now MIME encoding the whole "First Last <last@example.com>" string as opposed to just encoding "First Last". I will experiment more.

2013-09-08 16:55 - vinaigre

FWIW, the space was missing in older renewal reminders too (predating the MIME encoding fix).
