<b>Subject:</b>	More locales supported in xen-shell		
<b>Description:</b>	<p>Xen-shell is currently giving me the following warnings when logging in:</p> <pre>&lt;pre&gt; perl: warning: Setting locale failed. perl: warning: Please check that your locale settings:     LANGUAGE = "en_GB:en",     LC_ALL = (unset),     LC_TIME = "en_DK.UTF-8",     LC_MONETARY = "en_DK.UTF-8",     LC_MEASUREMENT = "en_DK.UTF-8",     LC_NUMERIC = "en_DK.UTF-8",     LC_PAPER = "en_DK.UTF-8",     LANG = "en_GB.UTF-8" are supported and installed on your system. perl: warning: Falling back to a fallback locale ("en_GB.UTF-8"). xen-shell v1.48bitfolk48 - type 'help' for help. &lt;/pre&gt; I see this "all the time" on new debian-installations without the locales-all package installed. It's no big deal, but it will make things a bit smoother for people with "slightly weird" locales if you could make sure xen-shell machines had locales-all installed.</pre>		

### History

- Status changed from New to In Progress

- Assigned to set to admin

I've installed locales-all on your particular host. Please can you try again and see if the errors are gone now? If so I'll install it on all the hosts.

Thanks! Works like a charm.

- Status changed from In Progress to Resolved

OK, thanks, now installed on all of them.
