

## Misc infrastructure - Feature # 203: Add deb.debian.org to apt-cacher.lon.bitfolk.com

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	admin	<b>Category:</b>	
<b>Created:</b>	2022-01-17	<b>Assigned to:</b>	
<b>Updated:</b>	2022-01-17	<b>Due date:</b>	
<b>Subject:</b>	Add deb.debian.org to apt-cacher.lon.bitfolk.com		
<b>Description:</b>	<p>The main feature of the @deb.debian.org@ mirror is geolocation, which is not relevant for BitFolk VMs, but its secondary advantages are:</p> <ul style="list-style-type: none"><li>* It's fronted by a CDN so it's more resilient than a single mirror host</li><li>* It is the example used in most Debian documentation</li></ul> <p>So, it should be enabled in BitFolk's apt-cacher and the Xen Shell installer should be made to install an <code>*/etc/apt/sources.list*</code> file that uses it in preference to @ftp.uk.debian.org@.</p>		

### History

**2022-01-17 15:21 - admin**

The @deb.debian.org@ URLs work in the apt-cacher now, e.g.

h2. debian buster

<pre>

```
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian      buster      main
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian      buster-updates main
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian-security buster/updates main
```

</pre>

h2. debian bullseye

<pre>

```
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian      bullseye      main
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian      bullseye-updates main
deb http://apt-cacher.lon.bitfolk.com/debian/deb.debian.org/debian-security bullseye-security/updates main
```

</pre>

installers still need to be made use them, and probably some examples on the wiki updated
