Subject:	Display details of IP addresses/networks assigned		
Description:	The list of IPv4 addresses and IPv6 prefixes that are assigned to the VPS should be visible in the panel. It's possible to see the IPv4 addresses by looking at the "DNS" section, but there's currently no way to see the IPv6 prefix(es). "Account > VPS Config" might be a more sensible place to just list them out.		

History

2011-12-27 11:08 - admin

- Status changed from New to Resolved

- Parent task set to #45

Details of IPv6 prefixes are now listed on https://panel.bitfolk.com/dns/

Eventually should be able to specify reverse delegation for these as per #45
