Subject:	Provide an alternate ssh port which has relaxed lockout settings		
Description:	<p>The sshd that BitFolk runs on port 22 of its VM servers will firewall IPs off for 10 minutes after too many failed login attempts.</p> <p>It would be a good idea to provide an sshd on an alternate more obscure port, which has more relaxed settings for this.</p>

- Status changed from New to Closed

sshd is now also listening on port 922 of host servers, and this port will not be blocked by Fail2Ban.
