Subject:	Ubuntu Natty installer produces a broken /etc/apt/sources.list file		
Description:	<p>The Ubuntu Natty installer produces an /etc/apt/sources.list file with a syntax error in it. It's looking like an over-zealous string replace on "natty-security".</p> <p>It can be manually corrected, e.g. in vi:</p> <pre>:%s#natty-apt-cacher.lon.bitfolk.com/ubuntu/security#natty-security#g</pre>
